(57) **ABSTRACT**

Embodiments of the present invention are deck accessory brackets, which are mounted to a vertical structure and are suitable for supporting a plurality of clothes lines and a variety of objects such as rods, shelving, hanging plants and hanging bird feeders. The mountable backing plate has 2 arms joined to it, one at an outward horizontally position, and one with a vertically angled supporting arm. The top horizontal arm has positioned receptors to which clothes line and/or rods are arrayed. The face of the mountable backing plate and the top of the horizontal arm are joined to a gusset.
