[57] ABSTRACT

A hanger for plants on fences and other surfaces is provided. The hanger consists of a support member with strengthening members and a holding member which extends from both sides of the support member and is positioned near the rear of the hanger. The front of the support member is provided with both a hole and peg which are for hanging plants or other items. A stop block allows the positioning of the support member against the fence. The stop block may be either fixed or adjustable. A mounting block is provided for using the hanger on structural surfaces such as walls.
