(57) **CLAIM**

We claim the ornamental design for an end portion of a
handicraft gauge, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view showing a handicraft gauge
according to a first embodiment of our design;

FIG. 2 is a top plan view of the same;

FIG. 3 is a bottom view of the same;

FIG. 4 is a front view of the same;

FIG. 5 is a rear view of the same;

FIG. 6 is a left side view of the same;

FIG. 7 is a right side view of the same;

FIG. 8 is a perspective view showing a handicraft gauge
according to a second embodiment of our design;

FIG. 9 is a top plan view of the second embodiment
handicraft gauge;

FIG. 10 is a bottom view of the second embodiment handi-
craft gauge;

FIG. 11 is a front view of the second embodiment handicraft
gauge;

FIG. 12 is a rear view of the second embodiment handicraft
gauge;

FIG. 13 is a left side view of the second embodiment
handicraft gauge; and,

FIG. 14 is a right side view of the same.

The handicraft gauge is usable in making a macrame plant
hanger for example. The gauge includes a plurality of lateral
projections each having a leading edge used to provide a
predetermined measure of length from a base end of the
gauge. In use, the gauge is used to provide a constant
interval between macrame knots in making a macrame plant
hanger. The broken lines showing the base portion and two
cooperative lateral projections are for illustrative purpose
only and form no part of the claimed design.

The broken line showing of structural features is included
for the purpose of illustrating non-claimed subject matter
and forms no part of the claimed design.
